

Je ne vais pas à l'école

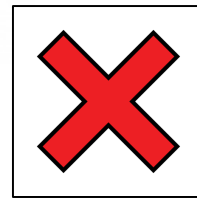

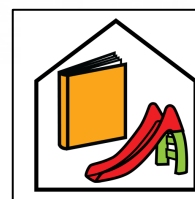

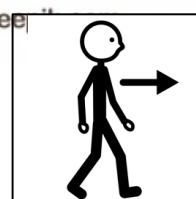

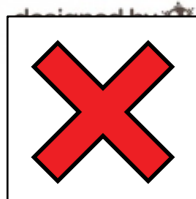

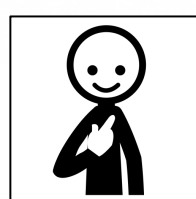

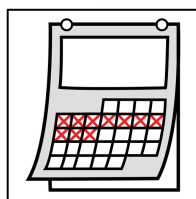

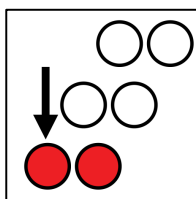

Beaucoup de gens tombent malades..

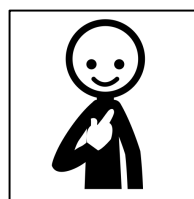

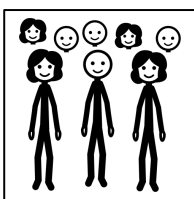

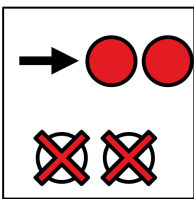

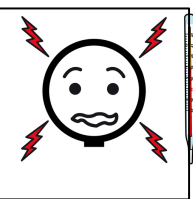

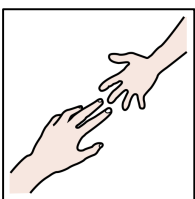

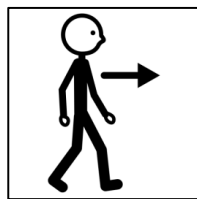

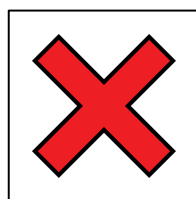

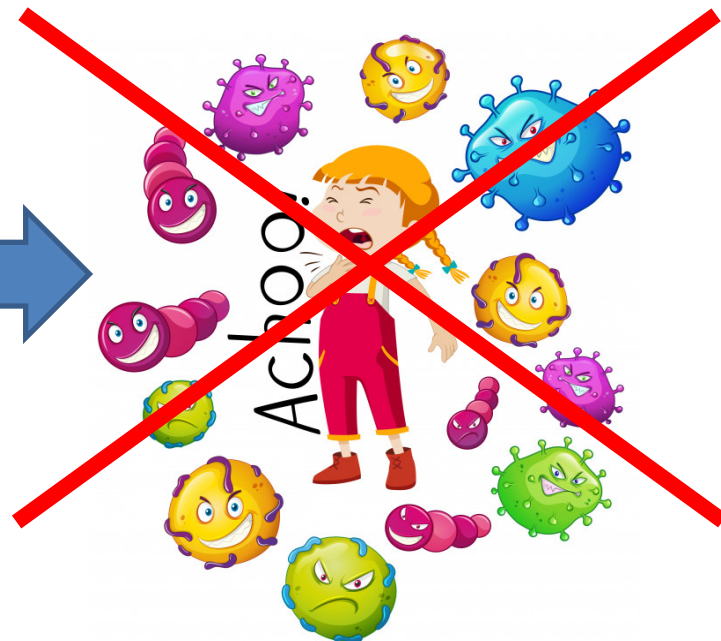

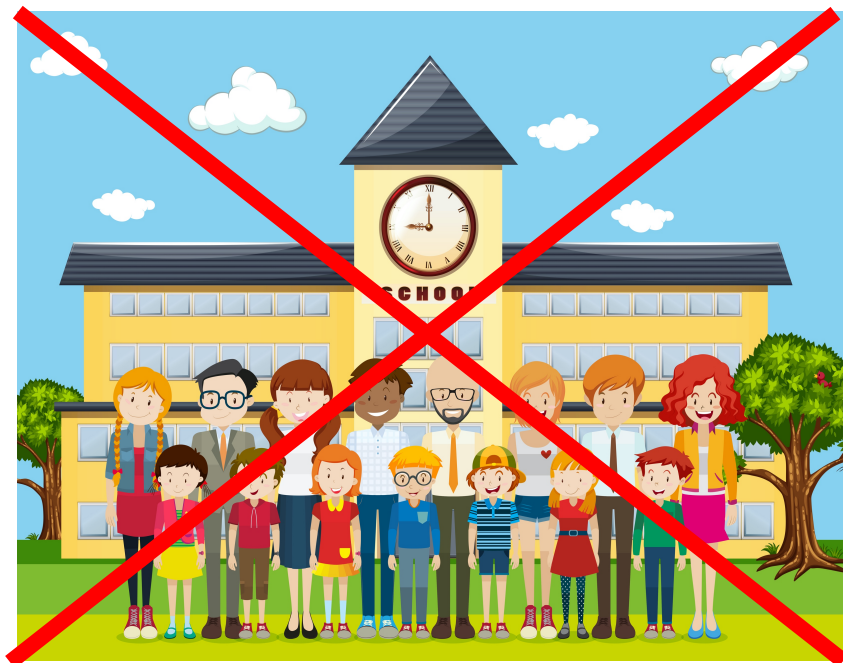

On nous a dit de ne pas aller à l'école.

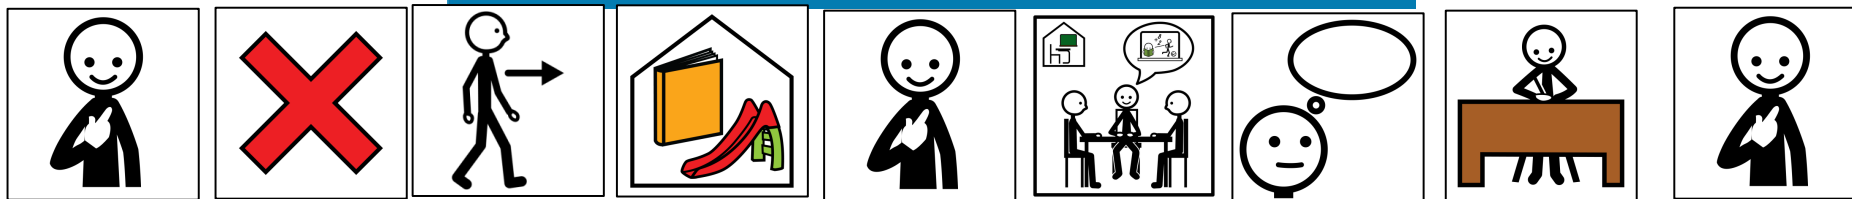

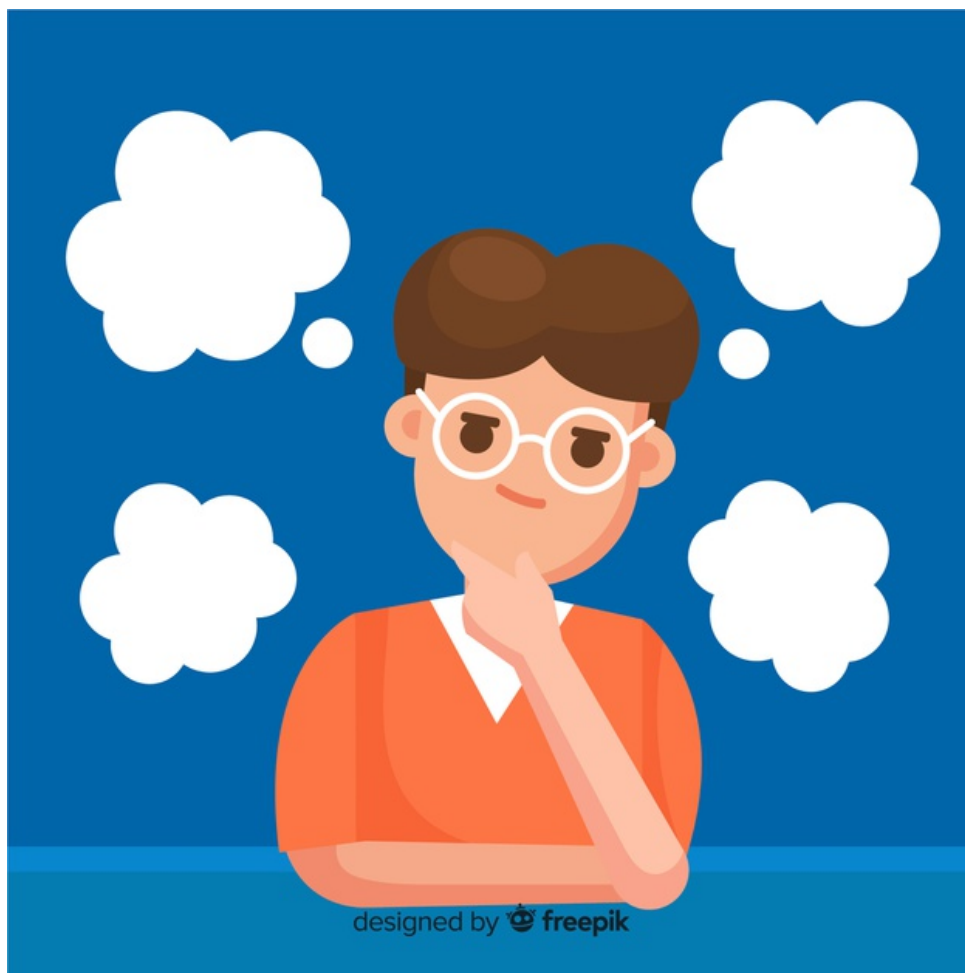

Ainsi, il est plus difficile pour moi et pour d'autres personnes de tomber malade.

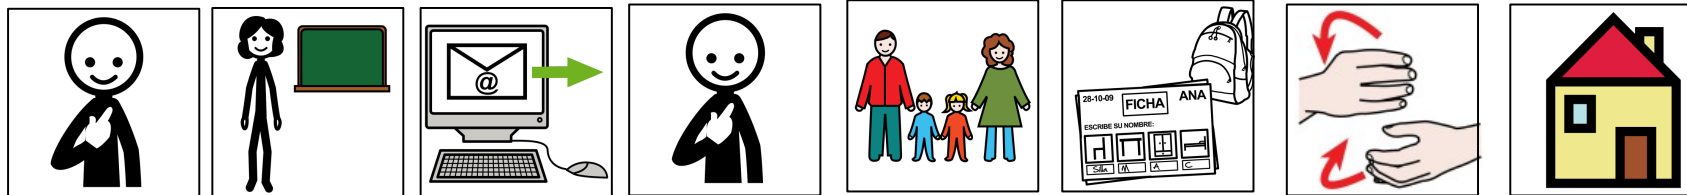

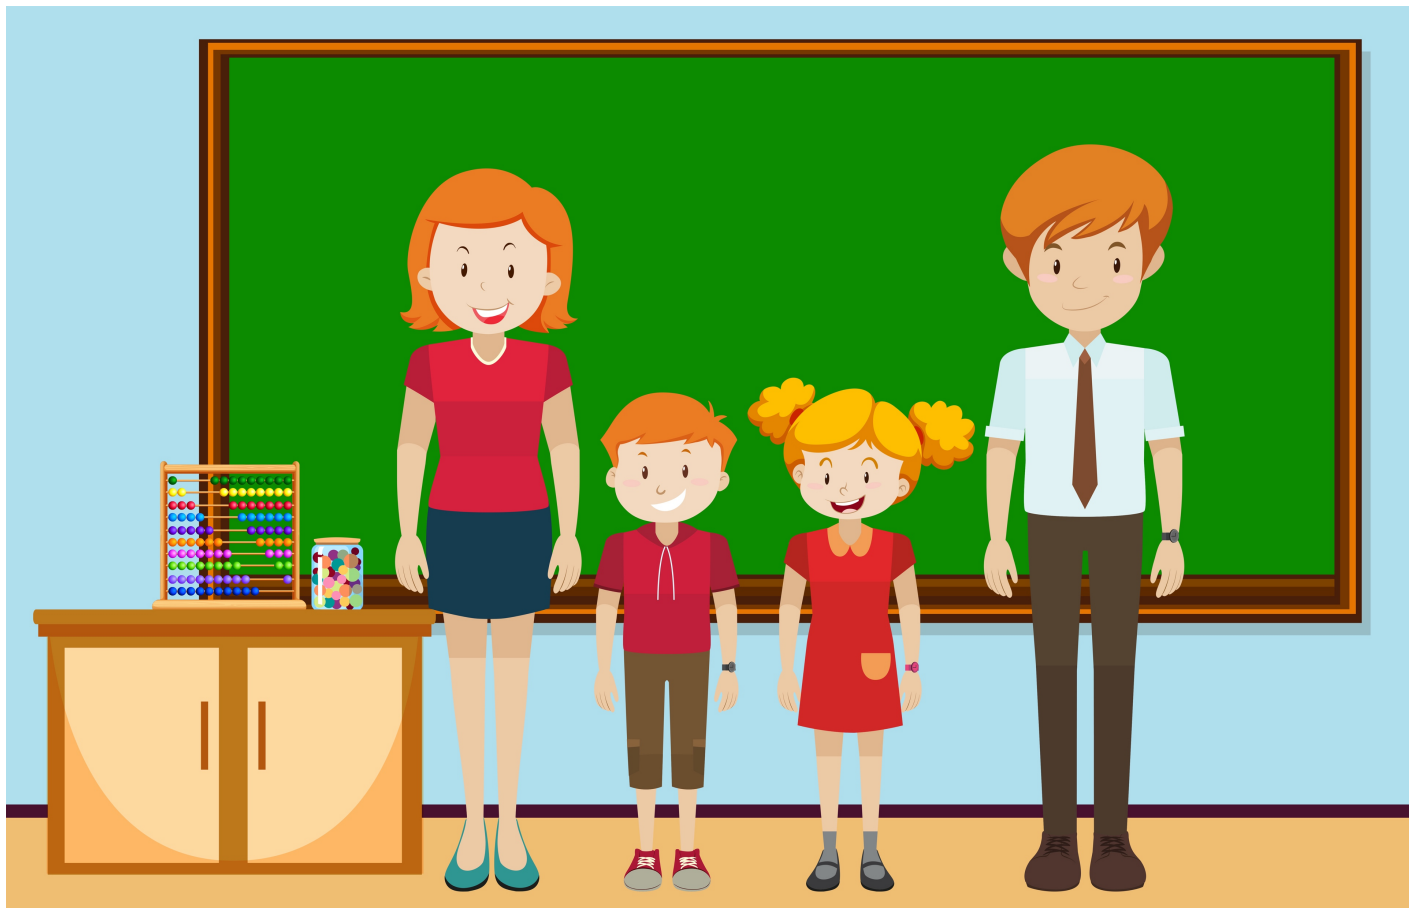

Aujourd'hui, si je ne vais pas à l'école, ce n'est pas les vacances.

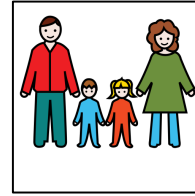

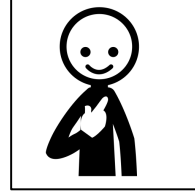

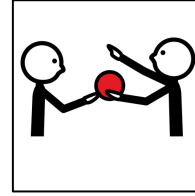

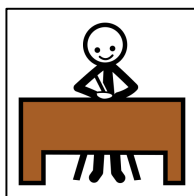

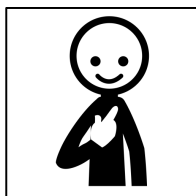

En n'allant pas à l'école, nous aidons les autres et moi à ne pas tomber malade.

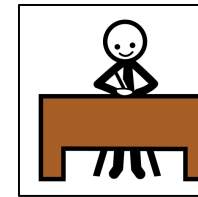

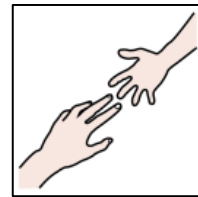

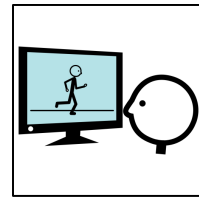

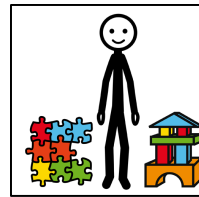

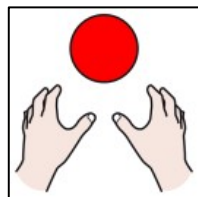

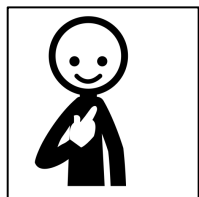

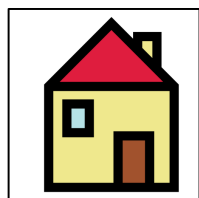

Même si je ne vais pas à l'école, mes professeurs pensent et travaillent pour moi.

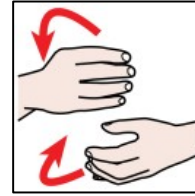

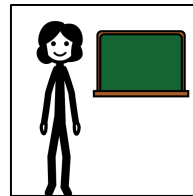

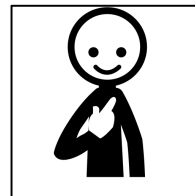

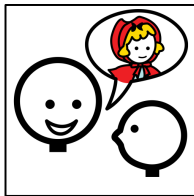

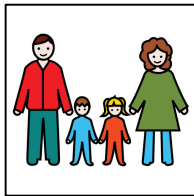

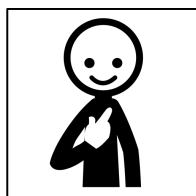

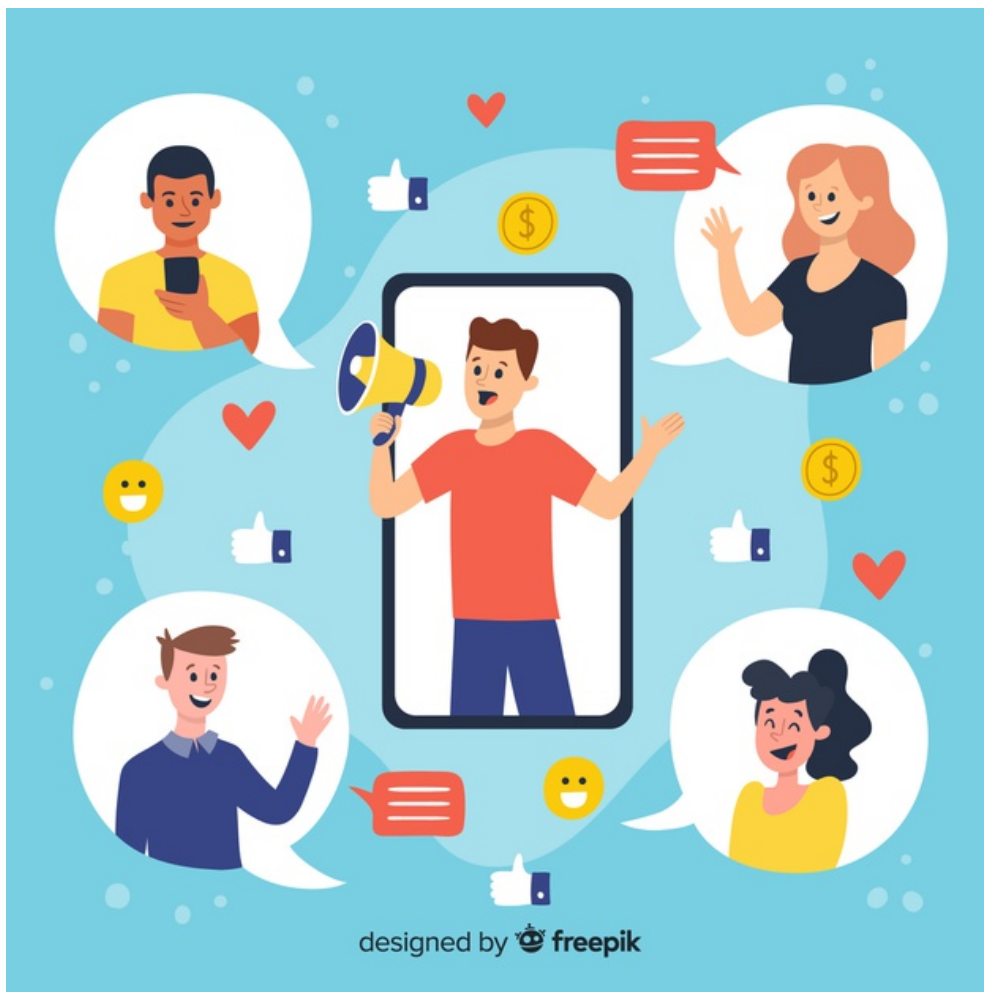

Mon professeur envoie à ma famille des devoirs à faire à la maison.

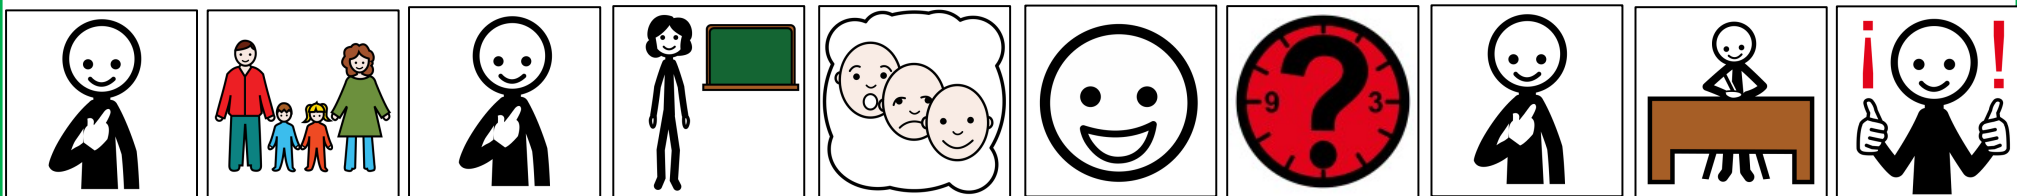

Je travaille très bien quand ma famille me les apporte.

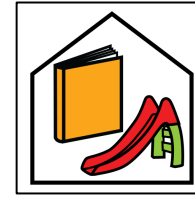

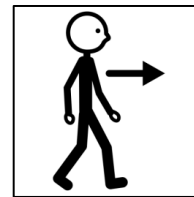

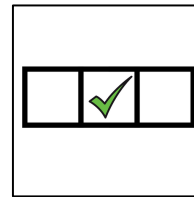

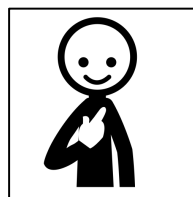

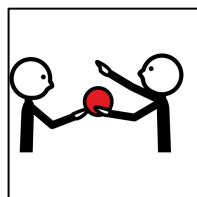

À la maison, je peux jouer, regarder la télévision, aider et travailler.

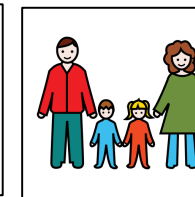

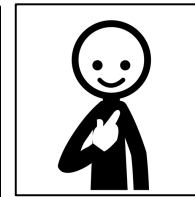

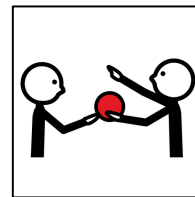

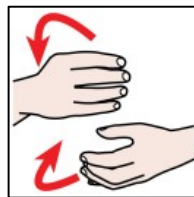

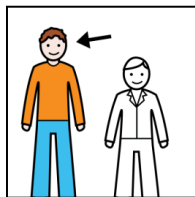

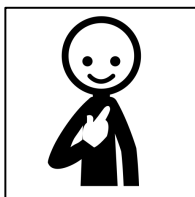

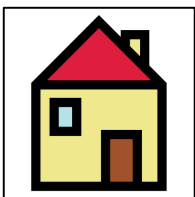

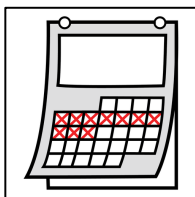

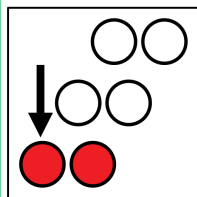

Ma famille dit à mon professeur ce que je fais.

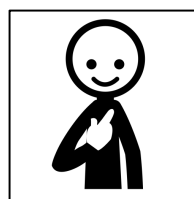

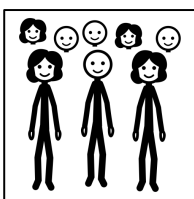

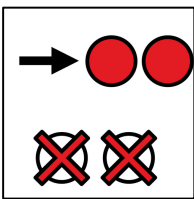

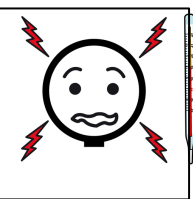

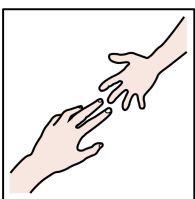

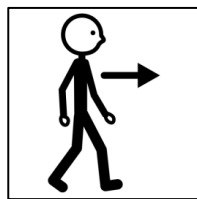

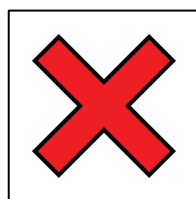

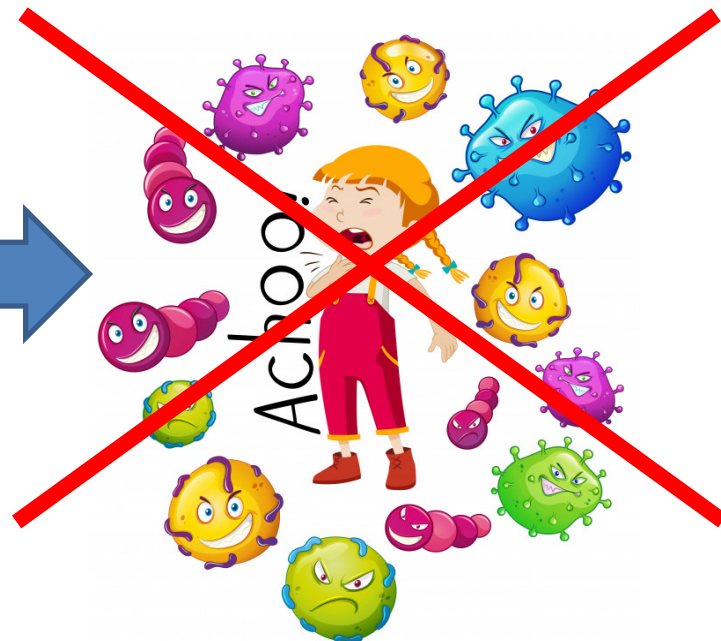

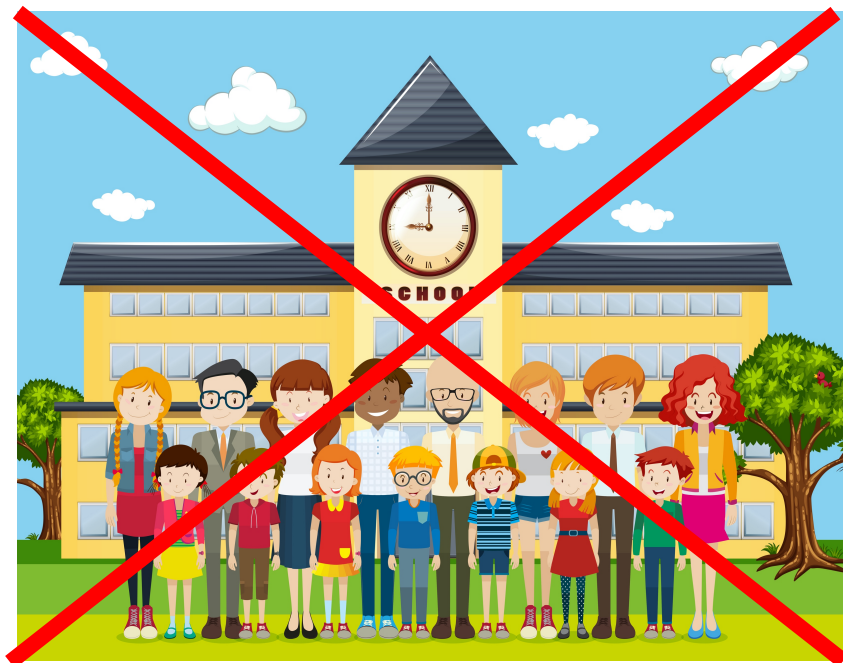

Ma famille et mon professeur sont très heureux quand je travaille bien.

Plus tard, j'irai de nouveau à l'école.

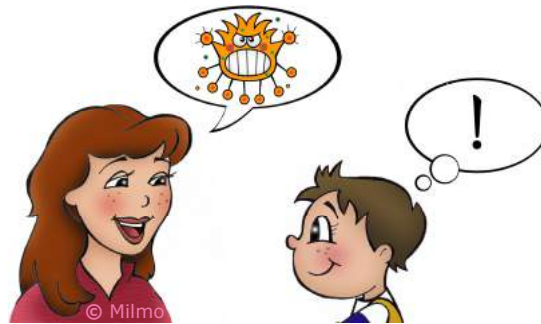

Ces jours ci, à la maison, je suis grand, et je dis ce que je ferai à ma famille.

En n'allant pas à l'école, nous aidons les autres et moi à ne pas tomber malade.

Le Coronavirus

Aujourd'hui, je dois te parler du **Coronavirus**.

Le **Coronavirus** ou « **COVID-19** » est un virus qui rend les personnes malades.

Mais tu dois savoir que nous pouvons avoir le virus sans le savoir et sans être malade.

Le virus se transmet par la salive.

Par exemple : si tu tousses ou tu éternues, le virus peut être sur tes mains.
Si tu touches des objets ou une personne, le virus peut se déplacer sur eux.

C'est pour cette raison que des mesures ont été mises en place pour nous protéger :

- Les écoles sont fermées

- Il faut rester à la maison sauf pour aller :

- Il faut faire des gestes « barrières » contre le virus comme :

Toutes ces mesures sont faites pour que le virus parte le plus vite possible.
C'est pour notre bien à tous ! Ce n'est pas une punition.

Nous ne savons pas combien de temps cela va durer.

Donc en attendant, trouve des activités pour t'occuper, comme :

Dessiner

Jouer

Lire

Regarder la télévision

Prendre une marche

Appeler ceux que tu aimes

Participer aux tâches

Chanter

Jouer à l'ordinateur
